

**INTRODUCTION**

The KA3361B is designed for use in FM dual conversion communication. It contains a complete narrow band FM demodulation system operable to less than 2.5V supply voltage. This low-power narrow-band FM IF system provides the second converter, second IF, demodulator. Filter Amp and squelch circuitry for communications and scanning receivers.

**FEATURES**

- Low power consumption (4.0mA typ. at  $V_{CC} = 4.0V$ )
- Excellent input sensitivity (-3dB limiting,  $2.0 \mu V_{rms}$  typ)
- Minimum number of external components required.
- Operating Voltage : 2.5 ~ 7.0V

**APPLICATIONS**

- Cordless phone (for home use)
- FM dual conversion communications equipment

**ABSOLUTE MAXIMUM RATINGS** ( $T_a = 25^\circ\text{C}$ )

Characteristic	Symbol	Value	Unit
Max. Supply Voltage	$V_{CC(MAX)}$	10	V
Supply Voltage Range	$V_{CC}$	2.5 to 7.0	V
Detector Input Voltage	$V_{I(DET)}$	1.0	$V_{P-P}$
RF Input Voltage ( $V_{CC} \geq 4.0V$ )	$V_{I(RF)}$	1.0	$V_{rms}$
Mute Function	$V_{MUTE}$	- 0.5 ~ + 5.0	$V_{peak}$
Operating Temperature	$T_{OPR}$	- 20 ~ + 70	$^\circ\text{C}$
Storage Temperature	$T_{STG}$	- 65 ~ + 150	$^\circ\text{C}$

Absolute maximum ratings are those values beyond which permanent damage to the device may occur. These are stress ratings only and functional operation of the device at or beyond them is not implied. Long exposure to these conditions may affect device reliability.

**ELECTRICAL CHARACTERISTICS**

( $V_{CC} = 4.0V$ ,  $f_o = 10.7MHz$ ,  $\Delta f = \pm 3KHz$ ,  $f_{MOD} = 1KHz$ ,  $T_a = 25^\circ\text{C}$ , unless otherwise specified)

APPLICATION CIRCUIT

Fig. 2

In the above typical application, the audio signal is recovered using a conventional quadrature FM detector. The absence of an input signal is indicated by the presence of noise above the desired audio frequencies. This "noise band" is monitored by an active filter and a detector. A squelch trigger circuit indicates the presence of noise (or a tone) by an output which can be used to control scanning. At the same time, an internal switch is operated which can be used to mute the audio.
