	Telefax number	+31 561 – 69 44 31

Product description

High quality, non-flammable tool to trace cracks in printed circuit boards.

Applications

Computers
Printers
Audio and video equipment
Machinery
Control panels

Product characteristics

Very effective
Directed jetspray
Briefly decreases the temperature to –55°C
Non-flammable
360° valve

Physical and Chemical Characteristics

Contents	:	290 ml
Basis	:	1,2,2,2 Tetrafluorethaan
VOC-content	:	100% w/w
Appearance	:	Icing
Vapour pressure at 20°C	:	3,5 to 4,5 bar
Boiling point	:	-24,8°C

Usage

Before use, carefully read the directions on the packaging and act accordingly.

The aerosol should have room temperature.
Best processing temperature 5 to 30°C.
Before use, shake the aerosol.

Keep the printed circuit boards under tension and spray for several seconds.
As a result of the fierce decrease in temperature, the crack will become visible.
